

# ERASMUS + THE SCHOOL OF MY DREAMS

## PROJECT

“The school of my dreams” is a two-year project that has been conceived to share experiences with partner schools in different parts of Europe. Our school was born with the aim of developing not only new teaching methodologies but also creating a safe and sustainable environment where students are the key actors in the learning process defining their goals and expectations on what their ideal school might be. Sharing experiences with other European schools that are carrying out similar projects will not only be essential for broadening our horizons but also for raising the students’ awareness of their role as global citizens.

## OBJECTIVES:

- Develop competence in the English language
- Improve the level of digital competence
- Broaden knowledge and application of new methodologies
- Increase awareness of the importance of sustainable development
- Boost democratic participation of students and other educational agents
